

Dr. Theofilos Triommatis

Curriculum Vitæ

Education

- 2019-2024 **Ph.D. in Computer Science**, School of Electrical Engineering, Electronics and Computer Science, University of Liverpool at Centre of Doctoral Training in Distributed Algorithms. Multi-agent Systems, Emergent Behaviour, Computational Geometry
Thesis Title: A Study of a Geometric Framework in Passive Localisation
- 2019 **Diploma of Applied Mathematical and Physical Sciences (5 years M. Sc. equivalent)**, *School of Applied Mathematics and Physical Sciences, National Technical University of Athens Greece GPA 6.9 (Good)*.
Specialized in Applied Mathematics, Statistics and Theoretical Computer Science
Thesis Title: A Study of the Permanent, #P-Complete Problems and Approximations Algorithms
- 2008 **General High School Certificate**, *High School of Kremasti, Rhodes Greece*.

Experience

- Nov 2023 - Present Postdoctoral Researcher at the Dynamic Systems and Simulation Laboratory, Technical University of Crete with the EU innovation action project TRACE, (Grant Agreement No 101104278) part of Horizon.
- Sep 2019 - June 2024 PhD level researcher in the project "Exploration and Exploitation with Passive RF Sensors" at the CDT in Distributed Algorithms, University of Liverpool (EP/S023445/1 EPSRC) with MBDA as industrial partner.

Awards and Achievements

- 2019-2023 Fully funded scholarship at the Centre of Doctoral Training in Distributed Algorithms, University of Liverpool.
- 2022 Awarded funding to present at the 38th British Colloquium for Theoretical Computer Science.
- 2020 Second place with the team of the University of Liverpool at Computing Insight UK Student Cluster Challenge (CIUK). A student competition on High-Performance Computing.

Technical Projects

- Nov 2019 - March 2020 Worked with a team of other PhD students, and postdoctoral researchers on statistical analysis using data from the library of the University of Liverpool to conclude the cross-departmental collaborations so that the university can enhance and nurture them.
- March 2019 - Sep 2019 Worked with Aris Pagourtzis (National Technical University of Athens), and Ian Magedera (University of Liverpool) on the website "French Books on India", that needed efficient algorithms for word processing.

Activities - Roles - Obligations

Task Leader in Platform Development Modules

2023 - 2026 *Leader of a team of technical partners in TRACE, responsible for the development and integration of components for Optimal Scheduling and Routing of Vehicles*

[Tutor at the University of Liverpool 2020 - 2023](#)

2020-2023 *Maths and Statistics for Data Science and AI* - 91 hours

2020-2023 *Complexity of Algorithms* - 48 hours

[Mentor](#)

2023 Mentor to first-year PhD students.

[Greek Army Service](#)

2017-2018 Military Service in the Greek Army (Mandatory)

Programming Skills

Programming PYTHON, C, JAVA, SQL, HTML, PERL, FORTRAN, HASKELL

Text - Expression L^AT_EX, MS WORD, MS EXCEL, MS POWERPOINT

Math Packages MATLAB, OCTAVE, MATHEMATICA, GEOGEBRA

Web HTML, CSS, JAVASCRIPT, WORDPRESS

HPC Skills OPENMP, MPI

Other Skills

○ Project Planning

○ Team Logistics Planning

Languages

Greek Fluent

Mother Tongue

English Fluent

Certificate of Proficiency from Michigan ECPE

Other Interests

○ Board Games

○ Dancing

○ Bowling

○ Pool
